

Hidden Deck Fasteners

There are several hidden deck fastener systems available. Visit www.deckfastener.com, www.deckmaster.com, www.ipeclip.com or www.invisifast.com for product information and a dealer in your area.

Fastening

To install, pre-drill a pilot hole and countersink; fasten with high quality stainless steel trim head screws. There are several quality fastener products; visit www.swansecure.com and www.fastapscrews.com for product information and a dealer in your area.

UV Protection

There are several quality UV protection products available; visit www.cabotstains.com for product information and a dealer in your area. We recommend using "Australian Timber Oil 3400/9400 Series" for decks and outdoor furniture. Visit www.penofin.com for product information and a dealer in your area. We recommend using the "Hardwood Formula" product. It's recommended that if you wish to keep your deck looking new as possible, coat it

GARAPA
GOLD

Incredible Strength & Durability

Top ratings for strength, hardness and durability have been proven again and again in demanding commercial and residential applications.

Long Life

Rated 25 years against decay and insect damage. Applications that have withstood 50 years, testify to the longevity of this material.

Maintenance Free

With Garapa Gold Decking, the application of sealers is purely optional. Garapa Gold Decking naturally weathers to a beautiful, silver-gray patina.

Fire Resistant

Garapa Gold Decking boasts a fire rating of Class A, the same as concrete or steel!

Environmentally Sound

Garapa Gold is harvested from managed forest projects. It is naturally seasoned and kiln dried to prevent shrinkage.

What is Garapa Gold Decking?

Garapa Gold Decking is an extremely durable South American hardwood. It has incredible strength and natural resistance to decay, rot, insect damage (marine boring worms & termites). Its fire rating makes it a perfect wood for long-life exterior decking, docks, benches and bridges

- So strong, dense and hard; Garapa Gold remains smooth and virtually splinter free for years and years, beautifully.

- Enjoy the beauty and warmth of real wood decking without the hassles. Garapa Gold is beautiful! It features a light yellow to golden brown colour range that will be the highlight of your landscape.

- Left unsealed, Garapa Gold weathers to a robust silver patina. An outdoor finish can be periodically applied to maintain its rich, natural colour.

Discover the unique properties that make Garapa Gold an easy choice for your decking project. Garapa Gold naturally resists wear, rot, splintering, termites, fire, chemicals, marine borders and virtually every other threat imaginable...*beautifully.*

Span

3/4" net thickness deck boards will span 16" on centre. 1" net thickness deck boards will span 24" on centre.

Spacing & Shrinkage

Allow a 3/16" gap on 6" wide decking and a 1/8" gap on 4" wide decking between the deck boards for drainage, air flow and expansion.

Kiln dried decking may expand 1/8" on 6" wide boards during times of high moisture. Expect some shrinkage in width in hot or dry areas.

Cutting and Drilling

Due to the density of Garapa, premium carbide tipped saw blades and high quality drills are recommended for smooth cuts.

End Sealer

If during installation, you need to end cut any boards, it is recommended that you end seal the fresh cut with "Anchorseal" to prevent end checking. One quart will cover 500 square feet of decking. Please visit www.uccoatings.com for product information and a dealer in your area.

There is no alternative for the natural *beauty* of Garapa Gold
